

Horticulture Basics with Instructor Mario Lanthier

Planting Trees and Shrubs - The Modern Practices

Knutsford Hall
Kamloops, BC

Tuesday November 9, 2010

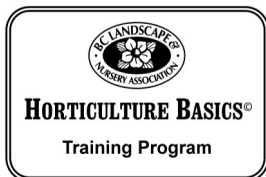

8:30am - 3:30pm

Make sure that tree survives. Things you do at the time of planting will have a big impact for many years. Join us as we discuss the practices that make a difference - the planting hole, the soil we add, the mulch we apply, and methods to conserve water after planting. Of special interest, we will examine the root system of many trees and shrubs, either field grown or container grown. Come learn what roots to remove before you plant - expect to be surprised!

Registration Deadline: November 8th

Free for those who are eligible!

1. Must be employed within the industry with a company that has less than 50 employees.
2. Must meet one or more of the following:
 - ◇ Has high school but lack additional certification recognized in Canada
 - ◇ Has not completed High School or has high school credential that is not recognized in Canada.
3. One time intake/exit forms to be filled out.

Must be eligible and pre-register by faxing back to 604-574-7773 or email jdemelo@bclna.com
