

Pest Problems Workshop

for pesticide applicators & landscapers

Friday, February 11, 2011
8:30 am to 4 pm

EECO Centre
2363 A Springfield Road

Admission is free

RSVP by
February 1

The City of Kelowna invites you, or members of your staff, to attend a free workshop.

This intensive one-day workshop is designed for pesticide applicators who manage landscape pest problems. The presentation will cover the common insect pests found in the region, such as aphids, spider mites, caterpillars, borers and others. We will examine typical damage symptoms and discuss management methods, including the best use of current pesticides and effective non-pesticide methods. There will be a hands-on session to help improve diagnostic skills and a review of new pesticides now entering the market.

Facilitated by Mario Lanthier
CropHealth Advising & Research

Please **RSVP by February 1** to Summer Bracey at sbracey@kelowna.ca or call 250 469-8883. Register soon, as attendance is limited to 25.
