Pruning Plants-The Basics for Entry Level Employees with Instructor Mario Lanthier

This one day workshop will review important concepts such as good tree structure, what to cut and where to cut, as well as pruning tools and their maintenance. The participants will realize the importance of this practice to maintain healthy plants and ensure a long life for the tree. They will not be master pruners but they will know “good pruning” from “bad pruning” and will be able to answer simple questions from your clients.

Participants should dress for the weather and bring their personal protective equipment (PPE).

Must be eligible and pre-register by faxing back to 604-574-7773.

Company Name: _____ Phone: _____
